# STATEMENT OF INTENT

Type Journal is an app aims towards type enthusiasts who enjoy spotting different typefaces being used in real world situation. With the app, the users can log in whatever typefaces they recognize and track their locations whenever they find them in use. The reason I want to do this app is because I'm a graphic designer and so I want to create an app centers around a topic I'm fond of. Spotting typefaces in real life usages is something I know many designers like to do so I'm appealing to those who share that same interest.
